SCULPTURAMA, Sunbeam Lighting Company's #7500 series Visionaire®, has the refinement in design and the sculptured look which fuses itself with today's architecture. Shallow in appearance, it forms a surface mounted, "area" source of pleasant, low-brightness illumination.

All-metal sides are gently curved and illuminated with interreflected light to reduce fixture-to-ceiling contrasts. The sturdily framed single-element diffuser opens from either side on continuous "hook-on" hinges and may be completely removed without use of tools. SCULPTURAMA is available for 2 or 4 rapid start lamps.

Sightline®

TAKES THE SQUINT OUT OF SEEING!

P132 SERIES

Patents Pending

Absolutely no glare, either direct or reflected, comes from SIGHTLINE® illumination. SIGHTLINE® illumination permits maximum visual acuity with no loss of contrasts at seeing task. SIGHTLINE® excels in every respect to ASA School Lighting Standards.

Sightline® is a truly integrated, totally indirect lighting system designed to produce high intensity illumination with minimum overhead contrasts. The soft, luminous appearance of the all-white system blends inconspicuously with the ceiling. The snap-out, ribbed diffusers will not become discolored. Strong, pull-resistant suspension system with 45° swivels allows maximum installation flexibility. Built-in tension keeps fixtures level. Ordered by complete rows, each unit is shipped prewired, ready to be connected to the circuit leads.

Rigid end plates for perfect alignment

All-white appearance blends with ceiling

Bonderite treated for corrosion resistance

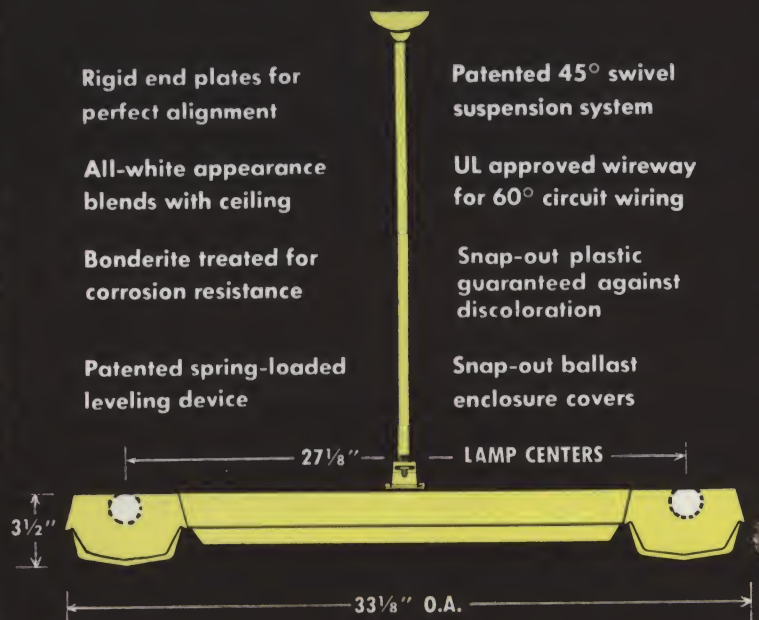

Patented spring-loaded leveling device

Patented 45° swivel suspension system

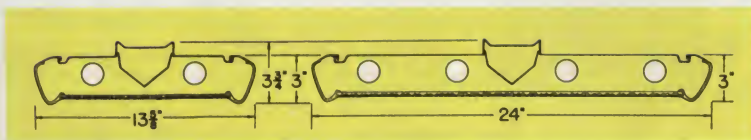

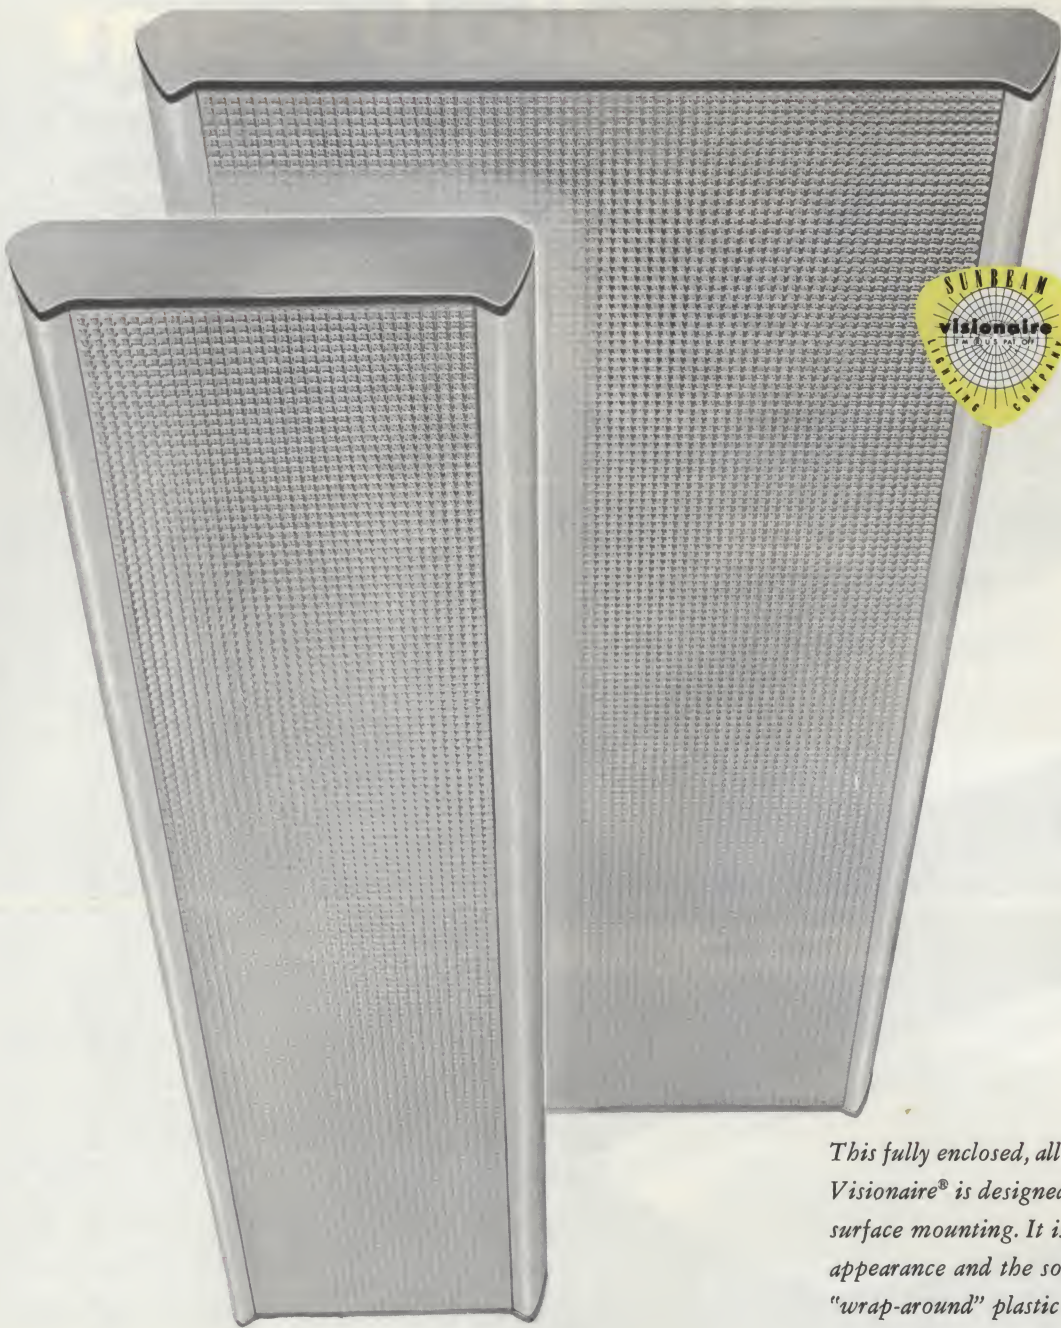

UL approved wireway for 60° circuit wiring

Snap-out plastic guaranteed against discoloration

Snap-out ballast enclosure covers

Attractive, ultra-shallow, all-plastic shielded Visionaire®

This fully enclosed, all plastic shielded Visionaire® is designed primarily for surface mounting. It is wafer-thin in appearance and the soft glow from its "wrap-around" plastic enclosure compliments any interior. Translucent white plastic side panels are interlocked with clear, optically sharp Sunlux® bottom lens panel forming a single-piece, lightweight enclosure. The plastic enclosure is sturdily framed in metal and may be opened from either side on concealed full-length "hook-on" hinges. Sunlux® has long-lasting resistance to discoloration and permits higher illumination efficiency with improved brightness control.

TOTALLY INTEGRATED, ULTRA-SHALLOW RECESSED LIGHTING

Patents Pending

shallobeam[®]

Attractive, ultra-shallow, all-plastic shielded Visionaire[®].

Shallobeam[®] is a high quality, ultra shallow recessed lighting system. With integral, trigger-released mounting bars, Shallobeam[®] simply snaps into most ceiling structures. Modular in concept, 1' x 4', 2' x 4' and 4' x 4' units may be "matched" in the same ceiling plan. Bonerite treated and finished in all white baked enamel.

9100 series

1' x 4' (nominal) shallobeam

Available for 2 or 3 lamps in 24" Trigger Start, 48" and double-48" Rapid Start. Fourteen types of diffusers and light control mediums are available such as miniature-celled plastic louver, Sunlux[®] lens panel, Holophane Controlenses*, etc. In "one-two-three" simplicity these units may be (1) lifted from shipping carton, (2) snapped into ceiling cavity and (3) quickly aligned and connected.

9200 series 2' x 4'

(nominal) shallobeam

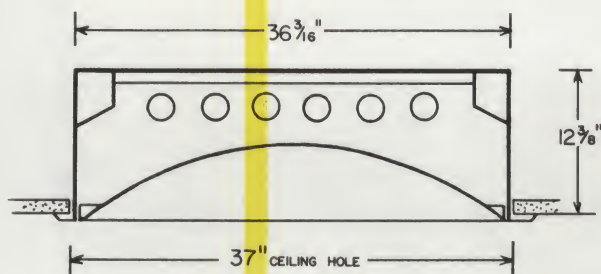

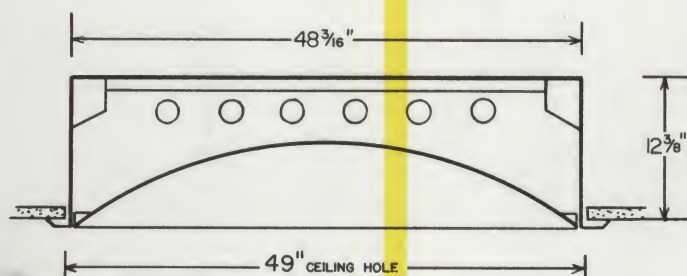

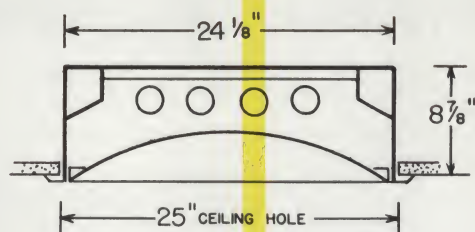

Available for 2, 3, 4, and 6 lamps in 24" Trigger Start, 48" and double-48" Rapid Start. Nine of the most useful and attractive diffusers are available including Sunlux[®], smooth "dropped" Plexiglas, Holophane Primalume* and some "flat" glass Elements. All shallobeam units incorporate "I-BEAM" castings which, bridge-like, give them unsurpassed strength and precision alignment.

9400 series 4' x 4' (nominal) shallobeam

These 4-ft. (nominal) square, "large-area" units complete the extensive choice of shallobeam. Available to take 4, 6, and 8 48" Rapid Start lamps. Various modern, plastic diffusing elements such as Sunlux[®], Holophane Primalume* and translucent Plexiglas are available. All shallobeams (1' x 4', 2' x 4' and 4' x 4') may be "matched" within the same ceiling plan.

* Holophane Co., Inc.

DECORATIVE CIRCULAR VISIONAIRES®

These circular recessed Visionaires® permit excitingly new lighting effects in lobbies, banks, auditoriums and private offices. Available in nominal diameters of 24" (CSP3820), 36" (CSP3830) and 48" (CSP3840). The long-lasting Plexiglas

diffusers are inwardly domed giving a skylight effect with low brightness "large-area" illumination.

The smart circular trim, fits flush to ceiling and the recessed enclosure is square-shaped allowing standard installation techniques.

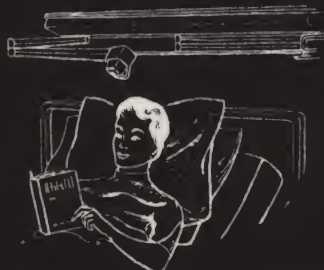

Patents Pending

TEN SERVICES IN ONE

Centron-10 is a single, totally integrated hospital bedroom service unit incorporating at least ten different services normally installed separately! Centron-10 is a new concept toward more efficient hospital bedroom planning. In one "package" Centron-10 provides pleasant general illumination, shielded reading lamps, color-corrected examination lamps, night lights, convenience outlets, provisions for audio-visual nurse call system and oxygen-vacuum systems, television lead-ins, phone outlets and accessory intravenous apparatus support arm.

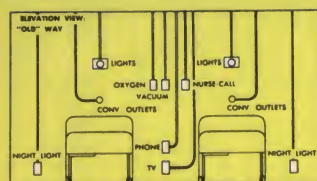

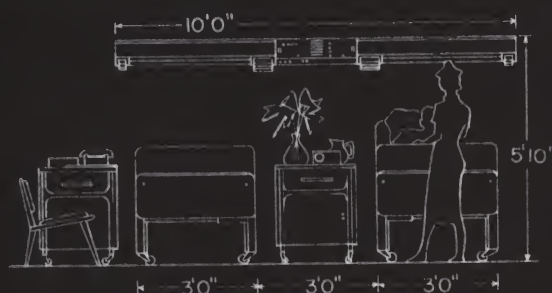

THERE IS NO OTHER SYSTEM LIKE IT!

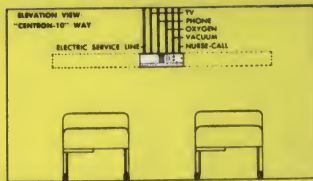

Narrow beam reading lamp on extendable arm adjusts to any convenient and normal reading position. It is cool to the touch.

High intensity, color corrected, pre-focussed exam light on extendable arm remains in whatever position the doctor chooses.

"OLDWAY"—Up to 22 service outlets clutter the walls of two adjoining rooms. Various fixtures and accessory equipment must then be separately ordered and installed.

"CENTRON-10 WAY"—Requires only 8 service lines for back-to-back installation. All auxiliary equipment may be consolidated into the one neat console. No separate fixtures need be ordered.

TYPICAL ORDERING INFORMATION

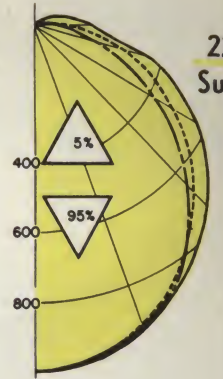

PLAN VIEW	CENTRON-10 NO.	DESCRIPTION
	RC2-4BRS	Complete single unit to serve one bed to right of console.
	LC2-4BRS	Complete single unit to serve one bed to left of console.
	DC4-4BRS	Complete double unit to serve one bed on each side of console.

Combinations of above units may also be ordered for back to back installation to serve adjoining rooms.

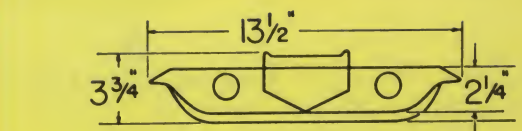

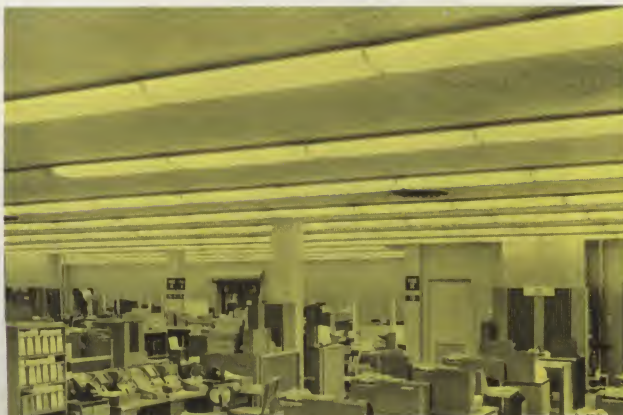

SHALLORAMA®

(patents pending)

a new dimension in lighting

Smartly styled, incomparably shallow, sturdily constructed, the SHALLORAMA® brings new dimension to architecturally planned lighting. No latches, hinges or other "hardware" mar its beauty. Surface mounted, these fully enclosed Visionaires® look recessed. Apparent depth is only $2\frac{1}{4}$ ". Handsome, translucent white, fully framed, high-stressed Plexiglas diffuser opens from either side on concealed "hook-on" ledges. The Plexiglas is guaranteed for long life and high transmittance efficiency. Unique leveling jacks compensate for uneven ceilings and assure precision alignment in continuous rows. Normal maintenance accomplished without use of tools. Available for 2 or 4 Rapid Start lamp operation.

SO SHALLOW IT LOOKS RECESSED!

P1290 SERIES

The clean-line P1290 series is a semi-direct, pendant mounted lighting system designed to produce high level, minimum glare illumination. Ideal for critical seeing tasks, these Visionaires® have ribbed, white plastic diffusers which transmit a soft glow that blends with the reflected light from the ceiling. Clear plastic top plates are available making units fully enclosed for reduced maintenance. Units available for 2 or 4 lamps 48", 72" or 96" nominal length.

These smartly slender, single-lamp, plastic shielded luminaires have wide application for both general and "local" illumination. They are specially designed to distribute more uniform light on vertical surfaces such as in corridors and library stacks. The molded, white plastic diffuser easily snaps open for maintenance. Available in nominal 24", 48" and 96" lengths.

P2800 SERIES

MODERN, SHALLOW, SURFACE MOUNTED VISIONAIRES®

QCCA6600: Curved Corning Albalite

QSDP4800: Smooth "dropped" Plexiglas

QPCX4600: Sunlux® plastic lens panel

For your convenience and service Sunbeam Visionaires® are manufactured at two complete plants: one at Los Angeles, California, the other at Gary, Indiana. Sales representatives in all major trade centers will welcome your inquiry and will assist without obligation in your lighting plans.

A full range of "matched" surface mounted luminous cells are available among the 6600, 4600, and 4800 series Visionaires® which are nominal 1' x 4', 2' x 4', and 4' x 4' modules respectively. Mounted side by side or in continuous rows, these compact, shallow, metal side units form a compliment to the recessed **shallobeam**® series. Various light distribution control elements and diffusers are available to fulfill almost any illumination requirement. No visible latches or hinges mar the clean lines of these units.
